New Pavilion and Improvements to the Recreation Ground- Update

The Parish Council submitted the amended planning application for the new Pavilion and improvements to the Recreation Ground on 30<sup>th</sup> September.

The planning application addresses all the concerns raised by the local planning committee when determining the initial submission back in June.

The new building will now be located directly behind the Doctors surgery away from surrounding properties and with the rear space secured. The proposed CCTV soon to be installed within the Recreation Ground is to be expanded to include the new building and war memorial. As the new location is closer to the Robert Street entrance we have had to reduce the number of disabled parking bays, there will be a turning area and space for service vehicles to both load and unload. There will also be cycle racks to accommodate up to 10 bicycles.

The new site plan is currently on display within the foyer of the Parish Office and the application is now on line for those who wish to view the entire planning documentation.

We continue to receive enquiries from interested users and resulting from the Healthy Living Fair, ideas from the community on potential usage.

We now await the local planning committee's decision which should be during the 1<sup>st</sup> week of December.

Councillor Bill Vaughan
