

## **Williton Pavilion Project**

### **Project Update.**

During November we managed to submit an Expression Of Interest for Sport England funding. The notice period was just two weeks and with the support of ENGAGE we made it with a day to spare. Sport England has advised that the fund is oversubscribed and of course we are in competition with other projects. If successful we will be able to bring forward the proposed Multi Use Games Area.

Initial feedback from our meetings with the Management Team has provided a number of suggestions and good ideas that we will be considering within the specification for the new building.

As the project moves forward we now have to give some thought to the work required to prepare for the construction activity. This includes working with the Football Club and other organisations who may wish to use or access the ground from Robert Street during the construction phase.

### **Fund Raising:**

Fund raising continues and the total funding now exceeds £580,000.00. February will be an important month for the Project as we expect to hear from the Big Lottery on whether or not we have been successful with our Stage 2 application.
